

Twister™ Hybrid Series

The best solution for hard floor restoration

Key Benefits

- Impressive honing performance
- Restore your floor instead of replacing it
- No more orange peel effect
- Enhances the Twister upgrade procedure

Description

The Twister by Diversey Hybrid™ system gives new life to damaged and heavily worn natural stone and terrazzo floors. Easy to use and environmentally friendly, the Hybrid™ gives you an opportunity to remove stains, scratches and “orange peel” using only standard cleaning machines and water. Restore your floor instead of replacing it!

Twister Hybrid™ Tool Black is the coarsest of segments. It removes deep scratches, lippage, excessive wear and staining.

Twister Hybrid™ Tool Red removes scratches, wear and staining. It prepares the floor for further improvement with Twister™.

Hybrid Description

Twister Hybrid tools consist of three different items; the Hybrid Holder, the Hybrid Twister (Star pad) and the Hybrid Black and Red segments. The pad and the holder are available in the following sizes: 17” and 20”. The segments are sold in boxes containing six segments.

Twister™ Hybrid Series

Instructions for use

- Best effects are achieved on standard floor machines > 90 lbs. (40 Kg). If used with an auto scrubber it must have adequate down pressure of > 120 lbs. (55 Kg) and move no faster than 2 mph (3 Km/h).
- Water is necessary in order to easily remove the slurry. Use a wet/dry vacuum or an auto scrubber to pick up the slurry.
- Apply water during the first pass and keep wet during the process. Remove slurry after each step in the renovation process. Rinse the Twister Hybrid pad between each step.
- On a smooth surface it can take some time before the diamonds are exposed and start to cut. You can speed this process up by using it on a rougher surface first.

Description	Size	Packaging	Article number
