

Especially non-irritant wash lotion,
free of colourings and perfume.

sensiva® wash lotion

Our plus:

- syndet – based on non-irritant tensides
- gentle on the skin, effective cleaning
- free of colourings, perfume and wool wax
- with allantoin to protect the skin against irritations
- pH skin neutral

Application areas

- for nourishing hand and body cleaning
- also ideally suitable for the food-processing industry
- for hand cleaning before surgical and hygienic hand disinfection

Application methods / indications

Hand washing

Moisten your hands with water. Apply approx. 2 – 3 ml sensiva® wash lotion to one palm, froth it by adding some water, wash thoroughly, rinse and dry. Before applying alcoholic hand disinfectants, careful drying must generally be ensured.

For hygienic reasons, it is recommended to use dispensers or dosing pumps.

Taking a shower

sensiva® wash lotion is to be used like soap or commercial shower lotions while taking a shower.

Product specifications

Ingredients:

Aqua, Sodium Laureth Sulfate, Sodium Chloride, Lauryl Glucoside, Allantoin, Phenoxyethanol, Benzoic Acid, Dehydroacetic Acid, Ethylhexylglycerin, Polyaminopropyl Biguanide

Chemical / physical data:

Appearance:	colorless
pH-value:	4,8 – 5,2
Viscosity (DIN 53 018):	1,000 – 1,500 mPa*s

Special indications

sensiva® wash lotion should preferably be stored at room temperature; possible deposition of ingredient is completely reversible when shaken and does not affect the quality of the product.

Decanting hopper	117 901

Please find detailed information in the schülke product information "Accessories and Dosing Aids".

Environment Information

sensiva® wash lotion is available in bottles and cans. The bottle and can containers are made of polyethylene (HDPE) and are labelled accordingly.

The caps are made of PP (except for the can and 1 l Euro bottle: HDPE). The labels are made of PE. This enables a homogenous separation for an optimal recycling.

The disposable packages of sensiva® wash lotion bear the "Green Dot" and should be introduced into the Dual System when completely empty.
