## Gold film, ABENA Cater-Line, 300m x 44cm, champagne, PE, unperforated

- ✓ Improved adhesion compared to regular PE film
- ✓ Perforations in the film makes it easy to work with
- ✓ 12 micron thickness for better food protection, stretching and handling
- ✓ Also suitable for pure fats, oils and fatty foods
- ✓ Good, all-round film

### Product Description

This film from ABENA's Cater-Line series can be used for storing all foods as well as for general household use. In other words, it is a really good all-round film, which is also suitable for pure fat as well as oily and fatty food. This PE gold film also has an improved adhesion compared to ordinary films. The strong PE film with a thickness of 12 microns ensures optimal protection of the food and is more robust in connection with stretching and handling.

### Specifications
